

Recurring revenue, \$25/month per member.

Pepti delivers doctor-prescribed peptide therapy to your members' doors. Host a free display, and every active member you refer pays you \$25 a month — for up to a year. Zero inventory, zero lifting.

HOW IT WORKS

- 1 We ship your display**
A premium display lands at your gym — printed with your unique [pepti] code and QR. Free, no setup.
- 2 Members scan & sign up**
A member scans, completes a quick medical intake, and a licensed physician reviews it. Meds ship to their door.
- 3 You get paid monthly**
\$25/month for every member who stays active — up to a year (\$300 each). Direct deposit, PayPal, or check.

WHY PARTNER

- No inventory, no fulfillment, no liability — prescribed by independent licensed physicians, shipped direct.
- Real medicine, not supplements — recovery, weight loss, anti-aging & performance peptides from FDA-registered pharmacies.
- At-home blood testing — baseline labs are included with every member's plan, with results reviewed by their physician.
- Flat \$25/month per active member, up to a year. No tiers, no thresholds, no clawbacks.
- Track every signup and payout in real time with a simple dashboard. Cancel anytime — no minimums, no exclusivity.
- Team perk: your employees get peptides at pharmacy cost for as long as you're an active partner.

THE MATH

At \$25/month per active member, for up to a year:

20 members	50 members	100 members	200 members
\$500 / mo	\$1,250 / mo	\$2,500 / mo	\$5,000 / mo
\$6,000 / yr	\$15,000 / yr	\$30,000 / yr	\$60,000 / yr

Ready to start earning?

We'll set up your code, ship your display, and get you live in about two days.

hellopepti.com/gyms

Illustrative projections, not guarantees. You earn \$25/month per active member for up to 12 months from their signup — only while they remain a paying patient. Actual earnings depend on how many members sign up and stay active. Pepti is a technology platform; treatments are prescribed by independent licensed physicians and compounded at FDA-registered pharmacies. Compounded medications are not FDA-approved. Available in Texas, Florida & Arkansas.

Not all peptide partners are legal. We are.

Before you put any peptide brand in front of your members, ask one question: is this actual medicine, or a gray-market research chemical? The answer decides how much risk your gym is carrying.

OUR CERTIFICATIONS

✓ LegitScript Certified

Pepti is LegitScript certified — the independent certification used by Google, Visa and Mastercard to verify legitimate telehealth and pharmacy operations.

✓ NABP — in progress

We are actively working toward certification by the National Association of Boards of Pharmacy, the gold standard for pharmacy accreditation.

THE GRAY-MARKET PROBLEM

Many gyms today are partnered with gray-market peptide suppliers — websites selling vials labeled “for research use only, not for human consumption.” That label exists because the products are not legal to sell as medicine. Distributing them to your members is extremely illegal, and the gym carries the exposure alongside the supplier.

Risks of gray-market peptides

- No physician oversight — no screening, no dosing guidance, no follow-up.
- Unverified purity: independent testing routinely finds under-dosed, mislabeled, or contaminated vials.
- No sterile compounding standards — real infection risk with injectables.
- No pharmacy, no recall system, no recourse when something goes wrong.

Risks for your gym

- Distributing unapproved drugs violates federal and state law — civil and criminal exposure.
- If a member is harmed, the gym is in the liability chain. General liability insurance does not cover illegal drug distribution.
- Payment processors and banks terminate accounts tied to gray-market sales.
- One incident or inspection can cost your license, your lease, and your reputation.

THE PEPTI DIFFERENCE

Every Pepti treatment is prescribed by an independent licensed physician and compounded at a licensed U.S. pharmacy, and every plan includes at-home blood testing — something no gray-market supplier can offer. Your gym never touches product and never carries inventory risk — you introduce a legitimate, certified platform and get paid for it.

Partner with the legal option.

Pepti is a technology platform; treatments are prescribed by independent licensed physicians and compounded at FDA-registered pharmacies. Compounded medications are not FDA-approved. Employee at-cost pricing available to employees of active gym partners; proof of employment required. Available in Texas, Florida & Arkansas.

ONSITE AT YOUR GYM

What you can keep onsite.

We stock your gym with at-home blood testing kits to keep onsite, right at your display. Members grab a kit, scan your code, and get started on the spot - legal, physician-reviewed, and zero inventory risk for you.
